## Hamilton Beach® Convenient Craft™ Rapid Cold Brew and Hot Coffee Maker

**Cold Brew or Hot Coffee in Minutes** - Making cold brew coffee can seem like a daunting task with the typical 12-to-24-hour time to brew. Enjoy cold brew coffee faster with this rapid cold brew and hot coffee maker by Hamilton Beach. Cold brew coffee is easily made in less than six minutes with taste you come to expect from your favorite coffee shop. Prefer hot coffee? This versatile coffee maker will have a hot cup ready in less than three minutes. Control how strong you want your cold brew or hot coffee by choosing the regular or bold setting.

**Cold Brew Coffee Brew Cycle** - Cold brewed coffee is known for its smooth and less acidic taste. To create that same experience, this coffee maker will create a one-ounce hot shot of water at the beginning of the brew cycle and then pause to allow that small amount to bloom. After the bloom, cold water pushes through the grounds to finish brewing.

**Versatile Brewing** - Brew a single cup of coffee or remove the included stand to fill a 16-ounce travel mug for a quick cup on the go.

**Cost Savings** - Load the coffee maker with your favorite grounds versus using costly pods. Not only will pod-free brewing save you money, but you will also enjoy the taste of any rich and flavorful ground coffee of your choice.

**Space Saving Design** - You get two coffee brewers in one machine with the slim, attractive design that takes up less counter space. There's no need to buy a cold brew maker and a hot coffee maker.
