Proctor Silex® Durable Mini Food Processor

Chops, Purees and Emulsifies – There's no need to bring out large equipment for small prep jobs when you have the Proctor Silex® Mini Food Processor. Chop, puree and emulsify in this compact food processor that has the power to create everything from homemade pico de gallo to fresh pesto.

Perfect for Salsas, Dressings, Chopping Onion and More – The 3-cup capacity is just the right size for everyday use, and the small batch tool holds even smaller amounts of food, like nuts, herbs or garlic, closer to the blades for better results.

Pulse for Even More Control – The pulse button provides stop- start processing control. Chop vegetables to the size you want or create bread crumbs that still have texture, with the control of a start and stop pulse button.

Additional Features – Use the convenient lid opening to add liquids and oils with ease. A custom-sized spatula is just right for food removal, and fits on the back of the chopper for easy access and storage. All removable parts are dishwasher-safe.
