

Hamilton Beach® Professional Spiralizing Stack & Snap™ Food Processor

Effortless Spiralizing: Purchasing pre-spiralized veggies may be time saving, but it also comes at a cost, with stores charging as much as a 400% mark-up for the convenience*. This new food processor takes the work out of spiralizing with a spiral blade for veggie noodles and a ribbon blade for veggie ribbons. You can serve healthier alternatives to noodle dishes without breaking the budget for those pre-cut options.

Innovative Food Chute: The Spiralizing Stack & Snap™ Food Processor also features an innovative food chute. The new chute is round to allow for larger, whole foods to be easily added to the bowl, such as potatoes and cucumbers. No need to dice and pre-chop before adding. This unique chute is intuitive and doesn't require a confusing interlock system, making adding ingredients more efficient than ever.

Maximum Versatility: Along with the spiralizing blades, this 12-cup capacity food processor is equipped with four additional attachments including coarse shredding, fine shredding, an S-blade for chopping and pureeing, and a dough blade for kneading. It comes with its own storage case to keep your attachments organized and safe between uses.

*Grocery Chain - Zoodles \$7.49/lb, Organic zucchini \$1.49/lb; 9/15/17

DETAILS

Product Name:

Hamilton Beach® Professional Digital Spiralizing Stack & Snap™ Food Processor (Model 70815)

MSRP: \$129.99

Availability: May 2020

Intuitive Stack & Snap™ Design: This Hamilton Beach Professional Food Processor is part of the unique Stack & Snap™ offering. Gone are the days of complicated positioning and twisting the bowl and lid into place. The bowl on the Stack & Snap is specifically designed to fit directly on the base and the lid is secured to the bowl with a simple locking arm. No more guessing whether it's put together correctly each time, just stack and snap the parts into place to start shredding, chopping and spiralizing.
