

Hamilton Beach®

Hamilton Beach® Smart Kettle

Connected Kettle - Take control of your smart kettle from anywhere in your house using the Alexa® app or Alexa® Voice Integrated smart speaker. Using simple commands, you can turn it on or off, adjust keep warm time, change temperature settings and get real time heating progress while going about your day. You can even customize unique phrases by programming Routines in the Alexa app. One fast, quick scan of the QR code connects the kettle to the Alexa app. There are no additional apps to download or accounts to setup.

Customized Temperature Settings - Craft the perfect cup of tea, boil water for noodles or heat water exactly where you need it for your recipe. This intuitive electric kettle comes with an easy-to-read LCD display that shows set and current temperature. Choose from 15 different temperature settings or enter anything from 100 to 212 degrees via the Alexa® App.

Large Capacity and Powerful - 1500 watts of power will bring water to a boil fast so you can enjoy your favorite hot beverage in a matter of minutes. The water reservoir holds up to 1.7 liters so you can heat up enough for you and everyone else at the table.

Convenience - Easily take the kettle from the countertop to the dining table with cord-free serving. When not in use, the cord wraps neatly at the base of the unit and out of the way reducing unsightly clutter.
